- 
- 1. Supply Chain Visibility**
  - 2. Data Collection**
  - 3. Data validation**
  - 4. Management & Reporting**

# Current state of play for many

- **Tier-1 suppliers** sell directly to retailers, maintaining strong, regular relationships providing good visibility.
- **Tier-2 suppliers** sell to Tier-1, with retailer visibility decreasing but details usually obtainable through the T1 suppliers.
- **Tier-3 suppliers** sell to Tier 2 suppliers, retailers visibility decreases substantially at this stage and for the lower tiers.

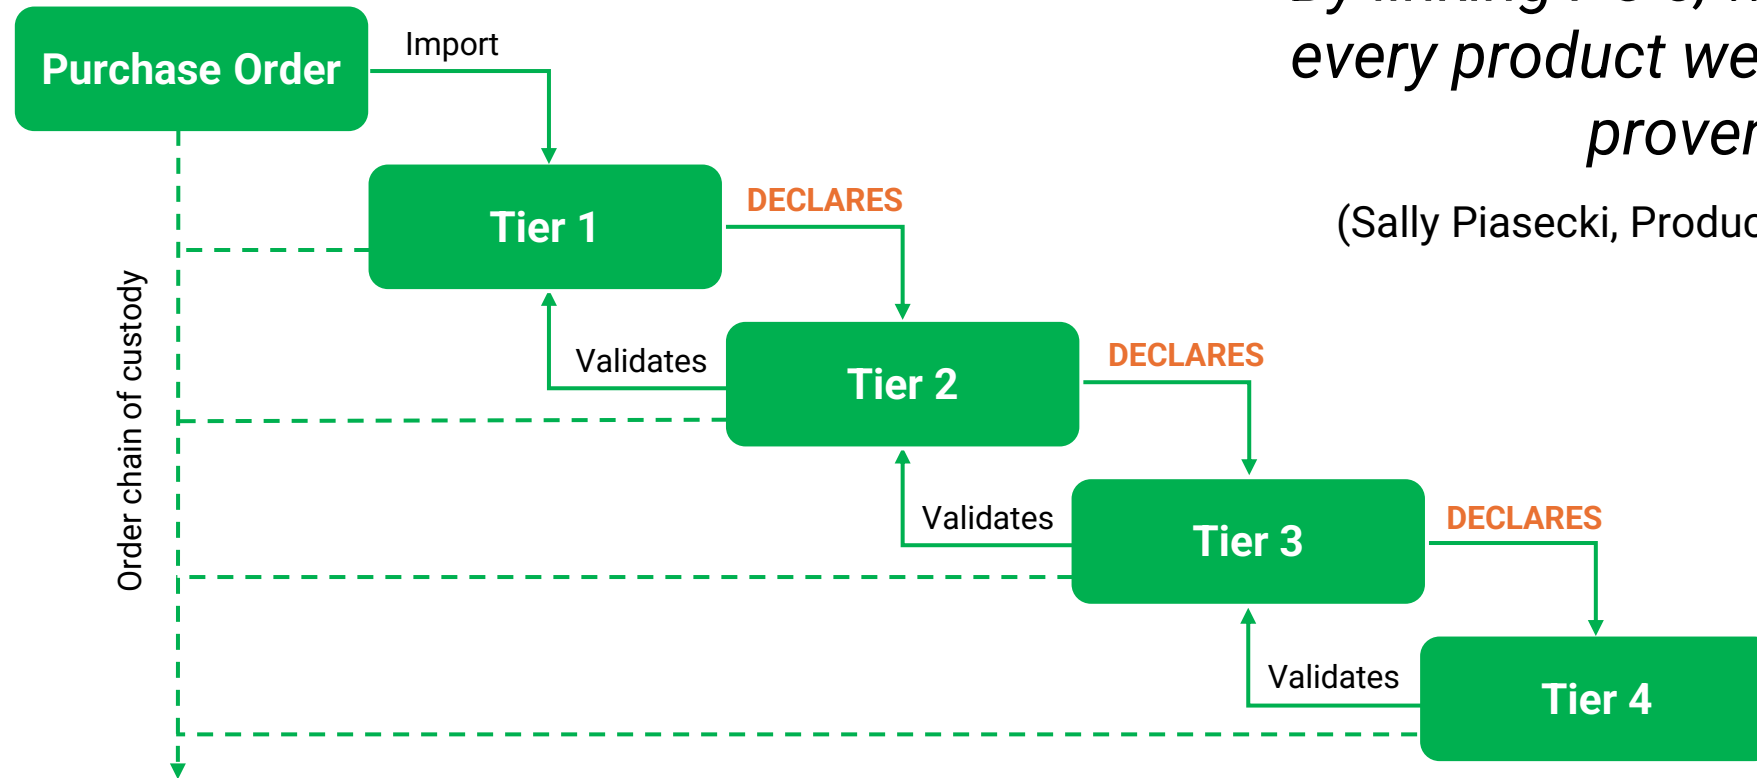

# How Segura collects data

# Two-tier Validation

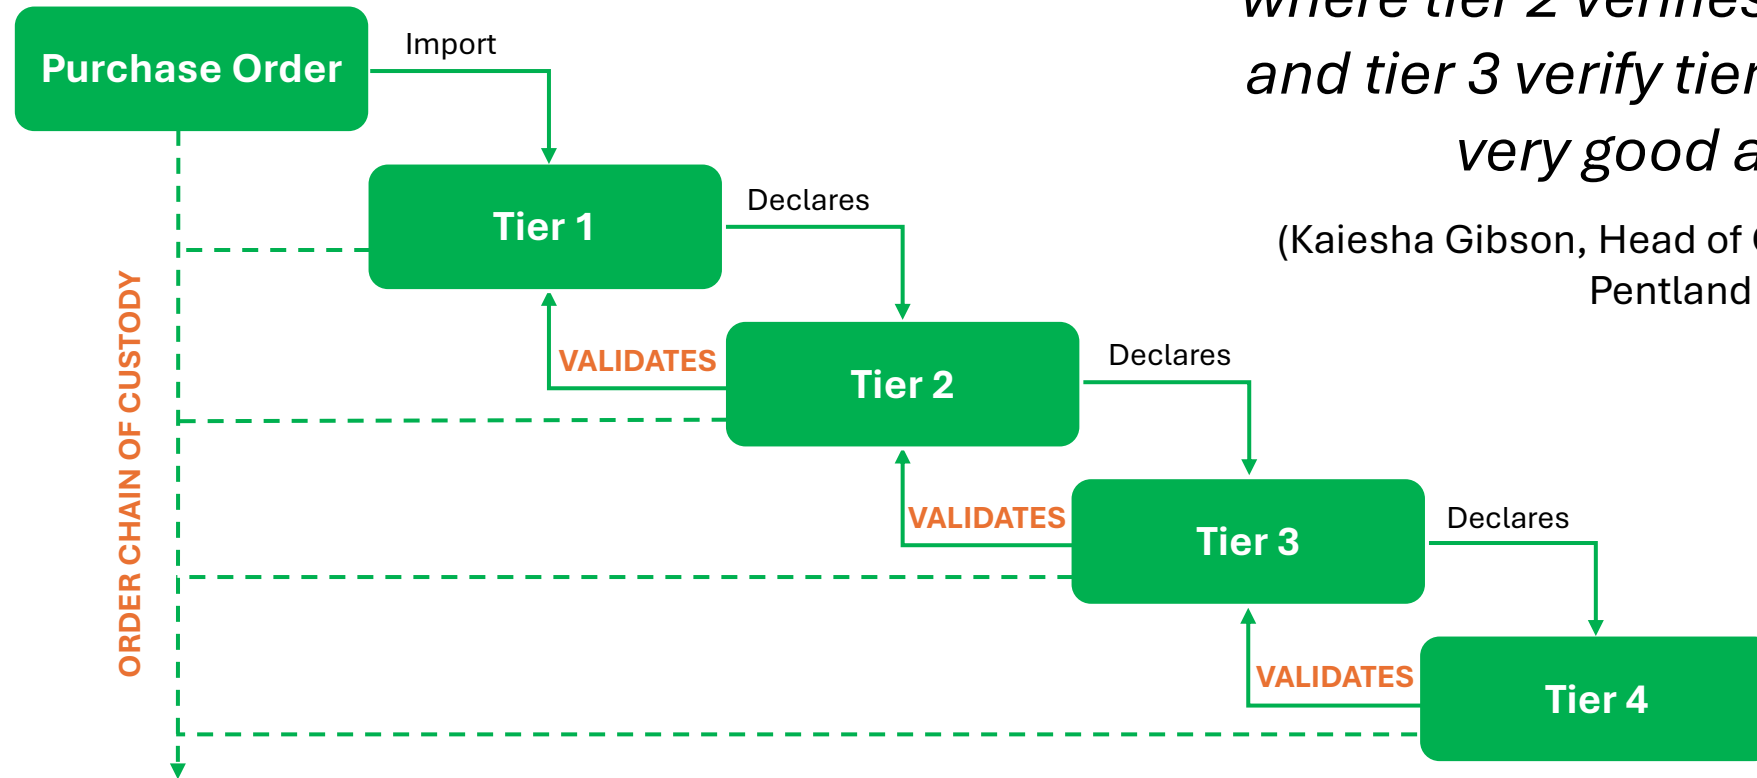

*“By linking PO’s, we are assured that every product we make has a clear provenance.”*

(Sally Piasecki, Product Director, Phase Eight)

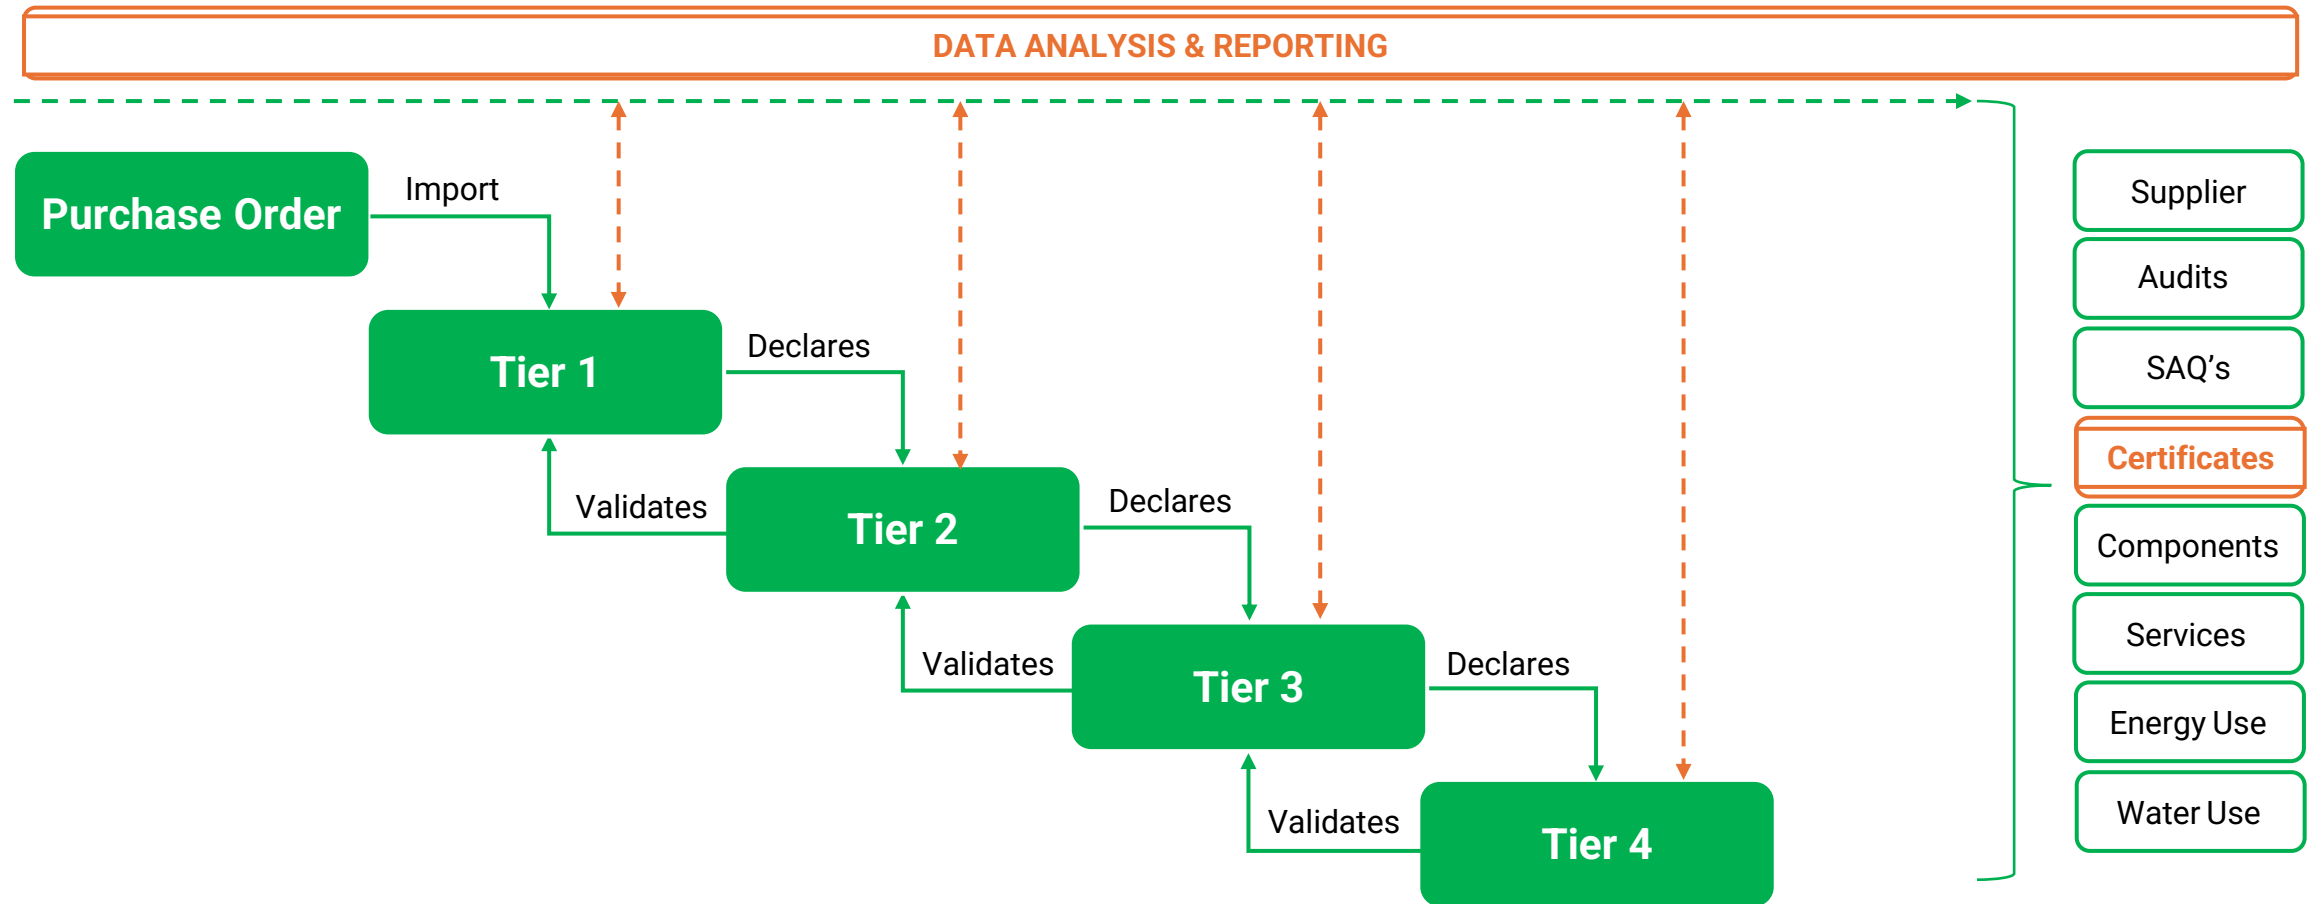

# Validation against the order chain

*“The way the information is verified, where tier 2 verifies tier 1 information and tier 3 verify tier 2 information is a very good approach.”*

(Kaiesha Gibson, Head of Corporate Responsibility, Pentland Brands)

# Validation against certificates

# Validation against certificates (WIP)

**Available**

**Certificate  
exception report**

**Available**

**Auto read-in  
data from PDF or  
upload**

**In progress**

**Validate declaration  
against certificate**

**Future**

**Validate certificate  
with issuer**

# Validate Green Claims

## Captured:

- ✓ Purchase Order Data
- ✓ Transactional Certificates
- ✓ Scope Certificates
